

Question and Answer -- June 19, 2016 -- The Only Living Law Firm in the United States

This is a very important priority announcement from Judge Anna.

1. I just deleted 43,000 emails. I have also been inundated with calls. Please, unless you have something that applies to the Big Picture, leave me alone and let me work. I am up to my ears in vexatious international claims and banking issues trying to recoup and deploy American assets. I do not have time to sneeze, and I cannot get involved in individual law suits.

2. I have 390 million Americans who are in deep Kim Chee, all of them wanting answers and remedies for everything from tax issues to unlawful arrests to foreclosures to correcting their political status. If there were any simple 1,2,3 and One-Size-Fits-All answers we would have published the recipe already. It's not that we are stupid and just need someone to suggest it, okay?

So far the kind of solutions that average people can easily apply by themselves have been few and far between.

You can all expatriate. You can all demand proof that you and your parents and grandparents ever knowingly and willfully accepted "United States" citizenship of any kind and that you complied with the Naturalization Act. You can collect your records--- Birth Certificates and genealogy. You can get the Birth Certificates authenticated for use in a Non-Hague convention country such as Taiwan and Indonesia. You can collect witnessed Affidavits from friends and family who have known you for a period of years who can attest that you were born in such and such place to such and such parents. You can know for sure that being a "citizen" makes you a subject of the government, while being an American State National--- a Virginian, Ohioan, etc., makes you the master of the government.

3. We have done successful probate actions to clear estates and reclaim property, but every state is different and has different procedures and rules and the process is not simple, so that it requires attorneys and the only attorneys who can do this work are non-Bar attorneys, who are in very, VERY short supply. Paralegals can be trained to help people do this process, but that requires staff time and resources, too.

4. We have researched the MERS and other fraud systems and patent and trademark ruses being used by the banks to create secondary "loans on top of loans" associated with every mortgage in America---- obtained under conditions of deceit and fraud and used to foreclose on homes and businesses. This is major league international fraud that needs to be addressed via class action law suits in Admiralty using Article X powers of the states of America against the federal corporations responsible. This requires expertise at a high level and money to support the researchers and lawyers and paralegals.

5. We have done highly successful habeas corpus actions and released people from federal prisons, but again, every case is unique and it has to be pursued one-by-one----and though much of the work can be done by family members, it has to be directed by someone who knows how to do this---- a paralegal, for example, who can assist. Those people have to be trained and they have to be paid.

6. Time and time again, I hear the whine--- "But what do I get out of it?" Does it make sense to everyone that you are not existing on a desert island and that what happens to the mass of people happens to you, too?

If hundreds of millions of Americans and Canadians and Brits and Aussies and Europeans are picked clean and defrauded by these banks, you think that doesn't affect you and your business? What does it mean to you to learn that "your mortgage" has already been paid off? Was in fact paid off at the closing table? And that there was never any loan involved? What does it mean to know that you have a false title on your property, so that you will never actually own it, even after you are done paying off that mortgage? What does it mean to know that these banks are using your signature to counterfeit credit "in your name" without your knowledge or permission? What does it mean that they are exercising trademarks and patents as a means to commit vast, wide-ranging fraud against you and your country? Think that you and yours won't be affected by that, so that I need to explain more about why you should support the work of those lawyers that ARE throwing away their rice bowls to defend the people of this country?

7. How about the millions of Americans being used for slave labor in the Prisons for Profit scheme? How much do you think their labor is worth? And how much do you think you are paying to keep those people incarcerated? Millions of Americans are in jail who have committed no crime according to the Public Law, and yet, they are being mischaracterized and living in the federal gulag system for no reason and you are paying up the wazoo for this "service"? Hello? What do you get out of seeing your brothers and sisters home and with their families and working in the private sector? What do you get out of not having to pay these goons to keep people under unlawful arrest? How does it benefit you and yours to see this ugly, criminal fraud scheme put down for good, so that it is no longer around to be a threat to you and yours?

8. How about the billions upon billions of dollars collected every year from Americans as "federal income tax"---- when in fact, the vast majority of you don't owe any such tax at all?

How would it benefit you and your family to tell the IRS to go blow? And no longer have to lay in bed at night in fear and terror of these godless bill collectors intent on extorting the value of your labor from you?

9. How would it feel to take back America from the Big Box Stores and restore mainstreet? How would it feel to force Monsanto to act responsibly? End chem-trails? End forced vaccinations? End "government" encroachment on your life and property?

10. In the UN and at the World Court, the rat scumbags responsible for all the miseries enumerated above are trying to say that you no longer exist, that you agreed to all this, that you are all nicely corralled and ready for "slaughter" and that the Republic no longer lives. They say that you are all good little "United States Citizens" and that you no longer run your own government and have no "Natural and Unalienable Rights"----- according to the treasonous vermin inhabiting the Beltway, you are just human "chattel" backing their debts, subject to their whims, "voluntarily" submitting yourself to be a "United States Citizen" and "voluntarily" using their funky IOUs in place of money, "voluntarily" putting up with all this fraud and extortion and crime against you and your property.

What is it worth to you to effectively tell the UN and the World Court that all that simply isn't true and never was true and is all a bunch of self-interested hokum being promoted by agents of the British and French Governments and their banks, operating under conditions of deceit and fraud and breach of trust? That you are very much alive and owed a LOT of consideration from all those who are otherwise pretending to be your creditors, but who are in fact your debtors?

What's in for you? Your freedom or your enslavement. You choose. Does the government serve you, or do you serve it? You choose.

I have assembled the best team anyone could ask for and everyone on that team is working hard to bring forth the badly needed answers and remedies to address these issues and more, but if you want a better world--- it's up to you to get on your hind legs and push for it now.

But HOW?

Support the team. Get behind The Law Firm ---the only law firm on this planet that really, truly has your back and is pushing for broad spectrum remedy for you and yours.

The PayPal account for this is: avannavon@gmail.com.

The thanks you get is in the form of: (1) first notification as the remedies and class actions come down the pike; (2) generally increasing access to non-Bar attorney lawyers and American Common Law; (3) assistance reorganizing your government on the land so it is no longer confused with corporate "service" organizations; (4) representation internationally, so that the rats can no longer pretend to "speak for" you and sell you down the river at the same time.

And lest anyone be confused--- this is very TEMPORARY need. We are well on our way to not only being self-supporting, but also being able to fund many actions without donations. This is a one-time-only plea for seed money help to get the pump primed.

Also, if you would like to give and get at the same time, you can always support the effort by buying copies of "You Know Something Is Wrong When.....An American Affidavit of Probable Cause" and distributing it to friends, family, and bureaucrats. This helps educate people about the problem and generates funding that is reapplied to the work before us.
